

# WOODSTOCK DAY SCHOOL COVID-19 DECISION TREE

Follow the appropriate path if a child, student, or staff person is experiencing the following symptoms consistent with COVID-19:

\*In any scenario, if a physician recommends a COVID-19 test, regardless of the result, the person must complete a 14 day quarantine.

- **More common:** fever greater than or equal to 100.4° F, new onset and/or worsening cough, difficulty breathing, new loss of taste or smell.
- **Less common:** sore throat, nausea, vomiting, diarrhea, chills, muscle pain, excessive fatigue, new onset of severe headache, new onset of nasal congestion or runny nose.

## Scenario 1: For people with ONE "less common" symptom

Evaluate symptom and determine if person is well enough to remain in school or program.

Well enough to attend or remain in school or program.

Stay home or send home and we recommend evaluation from a health care provider and/or COVID-19 test.

Return to school or program 24 hours after symptom improved.

Direct contacts to people in scenario 1 do not need to stay home or quarantine.

## Scenario 2: For people with ONE 'more common' symptom OR at least TWO 'less common' symptoms OR people who are a direct contact of a suspected case

Person stays home or is sent home.

We recommend evaluation and/or COVID-19 test from a health care provider.

Direct contacts remain at home or are sent home.

Does not seek evaluation and/or COVID-19 test from a health care provider.

RECEIVES:  
• Positive COVID-19 test result

RECEIVES:  
• Negative COVID-19 test result  
OR  
• Alternative diagnosis

Direct contacts to people in scenario 2 may return to school or program.

Direct contacts stay home and quarantine from all activities for at least 14 days.

Stay at home in isolation for at least 14 days from time symptoms started until symptoms improved AND no fever for 24 hours (without fever reducing medications).

## Scenario 3: For people who are a direct contact with someone who tested positive for COVID-19.

A direct contact is a person who was within 6 feet for at least 10 minutes of someone who is infected. This includes anyone who lives in the same household.

Stay home from all activities for at least 14 days since the last contact with the positive case.

We recommend getting tested 5-7 days after last contact with the positive case.

Even if the person receives a negative test result, they need to complete 14 days of quarantine before returning to school or program.

If symptoms develop and/or a positive test result is received.

Stay at home in isolation for at least 14 days from time symptoms started until symptoms improved AND no fever for 24 hours (without fever reducing medications).

Direct contacts to people in scenario 3 stay home and quarantine from all activities for at least 14 days.

Due to the porous nature of our campus and community, in the event of a student, staff, or faculty receiving a positive COVID-19 test result, we will immediately notify the local Department of Health, begin contact tracing, and move the whole campus to virtual learning for 14 days.
